ENVIRONMENTAL POLICY

Oktex del Punto, S.L. is a company specialized in the research and development of new weft knitted fabrics mainly for swimwear. always commited to protecting the environment.

Since Oktex was born, it has been focused on the protection and coservation of the ecosystem. Committed to this idea, in which we involve the entire staff, Oktex implements its " ECO-sustainable Vision" in all their production processes: from the choice of raw materials to the knitting, dyeing, printing and finishes.

In order to guarantee constant and continous managment of the environmental aspects driven from the activity carried out, Oktex implements and maintains an active Environmental Managment System.

The Company undertakes to take in consideration all known factors, connected to the territorial, socio-economic, cultural and organizational context to meet the needs and expectations of the interested parties. We commit to comply with the obligations derived from the legal prescription and other actions aimed at achieving the target of preventing pollution and reducing the environmental impact of all its processes and life cycles of its products.

It is the will of Oktex to contribute to preserving the Environment and to continously improve through a constant implementation of the Environmental Management System in order to guarantee the objectives below mentioned.

- Compliance with all current environmental laws and regulations, including commitments made freely by the Company itself.
- The management of all environmental aspects, paying particular attention to those most relevant to the activity at hand:
  - Selection of raw materials, trying to choose recycled raw materials and reducing waste.
  - Water and energy consumption, optimizing resource management as much as posible.
  - Reduction of emissions to the atmosphere, optimizing the technology of the already existing filterins systems.
  - Discharges of treated wáter: through constant management and control of insutrial waste derived from the activity.
- The search for a specific set of measurable objectives, in line with the current Policy, taking in consideration significant environmental aspects and impacts.
- Ensure the availability of the necessary resources to implement the current Policy and its maintenance over time as well as their control.
- Spreading environmental awareness and sensitivity among company personnel as well as their involvment to maximize the results of the implemented Philosophy.

The Company's managers must provide all the necessary resources for the development and maintenance of the environmental Project.

The current Environmental Policy has been communicated to all personnel and has been sent to all suppliers and collaborators; it is available to the public and to anyone whos asks for it.

The company guarantees the permanent surveillance of the Policy document at each reviewavle interval or in the event of any specific requirement.

CEO,
Joaquim Julià i Plana.
